

*GE gives you the Power  
to forge  
the Future*

*When it comes to systems automation and management, nobody gives you more control than GE. Our experience, flexibility and reliability mean simple, intelligent solutions for every aspect of your metal processing operation. With GE's technology, you've got the power of control. Power that impacts the quality of your product and your bottom line.*

## We Offer Processes, Not Just Products

With GE, our solutions go beyond products. We offer the capability to provide you with coverage over your entire process. From power to waste water, we provide a total system solution. So think GE when you need total process coverage!

Call your GE sales representative today for more information.

## Powerful Process Solutions

GE engineers are dedicated to keeping you up and running. From remote diagnostics to emergency spare parts and on-site services, we're there when you need us, 24 hours a day, 365 days a year.

# Reliable Solutions Backed With Metals Experience

## The World Of Metal Processing Requires Power And Control

At GE, we're providing solutions for every aspect of your operation, from casting to rolling to galvanizing. GE automation systems and application technology give you control of your entire production process from start to finish. From our open systems

designs to our full range of services, GE process solutions allow you to maximize your productivity and profitability.

## Iron-Clad Solutions

We have over 75 years of experience in the metal processing industry and we can put that experience to work for you. Our metal system solutions are built to last and have been field tested in the harshest environments to assure you the highest levels of reliability.

## Hard-Working Intelligence

Providing intelligence with our software models and advanced process control, we deliver quick, precise, dependable interaction between your operation and the control system. By making your slitters, rollers and reduction mills smarter, GE insures that your entire operation works more efficiently. Our user friendly Graphic User Interface lets your operators easily use the most advanced technologies.

## Simple Solutions For Your Entire Process

GE system solutions don't just control, they communicate. From process automation systems to drive systems to power supplies and motors, we connect your entire operation to get

the most from each component. GE provides assistance in fully understanding your process to maximize your productivity and equipment usage. We make the connection to your business enterprise system to help provide optimization of processes and business solutions.

## Flexible Solutions That Grow With You

As your business expands, so will your GE system solutions. We are leaders in providing productivity enhancements designed in anticipation of industry changes. GE continues to invest in application knowledge and technologies needed to maximize your process productivity. Our services continue to expand to help your business to reduce costs and increase productivity.

## Metal Processing Solutions That Put You In Control, Start To Finish.
