## GE Fanuc new product Launch Sydney, 26<sup>th</sup> August 2004

Details on Page 3

### Historic New Project kick-off Meeting

Australia's leading Steel Manufacturer understands the importance of historical data retention. After a comprehensive evaluation of all major product suppliers, GE Fanuc's Proficy Historian was selected. The contract includes the custom development of an OPC Driver to interface with Setcim, in addition to the supply of interfaces with various PLC, DCS and other production platforms.

Proficy Historian (formally iHistorian) is a plant-wide data historian that collects, archives and distributes tremendous volumes of real-time, plant floor process information at extremely high speed. Proficy Historian represents a leap in the performance, utility and affordability of plant-wide data historians. Scalable to 100,000 data points per server, Proficy Historian delivers high-volume data collection and retrieval, without sacrificing speed or performance.

For more information on iHistorian see  
[www.gefanuautomation.com](http://www.gefanuautomation.com)

iHistorian Team consisting of (L to R) John Zagame, Steven Wiles\*, Catherine Gonzales\*, Mitchell Giles\*, Paul Newman, Paul Massarella, Steven Tomassini

### New IEE Brisbane Office iOpened

IEE Services Pty Ltd began its operations in 1990.

We are focused on understanding our customers business, and then assisting them by developing solutions to help achieve their business objectives.

With a new sales, support and training facility in Menai (Sydney) as well as offices in Wollongong, and now Brisbane our strategy is to provide total customer support to help you get the best out of our products and solutions.

Our team of dedicated professionals have hundreds of years of combined experience in the provision of business & process control solutions, instrumentation and automation systems.

# PACSystems RX3i Controllers Released

(from page 1)

The new PACSystems RX3i controller from GE Fanuc is the latest addition to the innovative PACSystems family of programmable automation controllers (PACs).

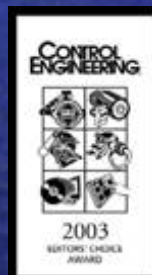

Like the rest of the family, the PACSystems RX3i features a single control engine and universal programming environment to provide application portability across multiple hardware platforms and deliver a true convergence of control choices.

## PACSystems RX3i Features:

- High-speed processor and patented technology for faster throughput without information bottlenecks
- Dual backplane bus support per module slot: High-speed, PCI-based for fast throughput of new advanced I/O + Serial backplane for easy migration of existing Series 90-30 I/O
- Celeron (Pentium III) 300 MHz CPU with 10Mbytes memory
- Memory for ladder logic documentation and machine documentation (Word, Excel, PDF, CAD and other files in future releases) in the controller to reduce downtime and improve troubleshooting
- Open communications support including Ethernet, GENIUS, Profibus, DeviceNet, and serial
- Hot insertion for both new and migrated modules

*One development tool.  
One engineering environment.  
Multiple applications.*

## Proud Winner of:

## IEE Training Services

**Our comprehensive Training Services are designed to be flexible to suit your needs.**

### Courses include:

- Cimplicity Plant Edition Introductory Course.
- Cimplicity Plant Edition Advanced Course.
- Cimplicity Machine Edition, VersaPro, LogicMaster Programmer Courses.
- Proficy
- iHistorian, InfoAgent

Training - either on/off-site, 1 - 5 days

**BONUS FREE** (ask for details)

- Lunch & Learn - on-site, 1 hour, Free
- Seminars - off-site, 1/2 day, Free

## Meet our Management Team:

**PAUL MASSARELLA** Director

**STEVE TOMASSINI** Director

**PAUL NEWMAN** Projects Manager

**JOHN ZAGAME** General Manager

Sydney, NSW  
Telephone : (02) 9543 3611

# GE Fanuc new product Launch Sydney, 26<sup>th</sup> August 2004

## SEMINAR INVITATION - THE POWER OF ONE

*If making real-time business decisions is part of your responsibility then this seminar series is a must for you to attend.*

### FEATURING

SOLVING BUSINESS NEEDS IN MANUFACTURING – TURNING PLANT DATA INTO DOLLARS AND SHOWCASING THE LATEST IN PLANT APPLICATION AND AUTOMATION SOLUTIONS

**PRESENTERS:** Rich Carpenter - Director of Product Marketing, Lester Copper – International Business development Manager –MES and Plant Applications, Van Rafael – Director of Software Solutions Asia Pacific – GE Fanuc Automation.

**Recommended Audience:** Plant Managers, Engineering Manager, Production Manager, Projects Manager, Manufacturing Engineer, MES & IT Managers, Controls Engineers, Business Decision Maker.

### MORNING SESSION 9:00AM – 12:30PM

LEARN THE BENEFITS OF APPLYING REAL-TIME PLANT APPLICATIONS TO SOLVE MANUFACTURING NEEDS AND TURN YOUR PLANT DATA INTO DOLLARS.

### AFTERNOON SESSION 12:00 PM – 3:30PM

DISCOVERING THE LATEST IN NEW TECHNOLOGY FOR PLANT VISUALIZATION, WEB REPORTING, PLANT DATA HISTORIAN, CHANGE MANAGEMENT, AUTOMATION AND CONTROL SYSTEMS.

Seminar Location:  
**Park Hyatt Sydney**  
7 Hickson Road  
The Rocks Sydney  
NSW 2000 Australia

**REGISTER TODAY by email to:**

[sales@iopen.com.au](mailto:sales@iopen.com.au)

**Nominate one or both sessions.**

*A light buffet lunch will be provided for attendees of either session*
